Parent-Child Products: Droplist View

PARENT-CHILD PRODUCTS: DROPLIST VIEW

- ✘ Purpose of this video:
 - + Define and demonstrate the Droplist View for Parent-Child Products
 - + Define the data requirements
 - + Demonstrate data entry in CSV files
 - + Demonstrate data entry in Web Driver
- ✘ Prerequisite Videos: Maintaining Product Data, Product Catalog – Base Options, and Parent-Child Products Overview.

PARENT-CHILD PRODUCTS: DROPLIST VIEW

- ✘ The droplist view is one of several views available for parent-child products. Using droplists to display child product attributes, the user selects their options, narrowing down to a single child product. The droplist view is available in up to 4 droplist.
